CONNECTING THE UNIT TO POWER

AC OPERATION

Plug one end of the AC adaptor into the DC power Input, and then plug the other end into AC wall outlet. Before switching on the unit, make sure that the voltage of your electricity supply is the same as that indicated on the rating plate.

Attention:

1. Do not plug or unplug the power cable while you have wet hands.
2. When planning not to use this unit for a long time, disconnect the power cable from the wall outlet.
3. When disconnecting the power cord from the wall outlet, do not pull on the cord in order to avoid shock risks caused by damaged cable.

BATTERY OPERATION

Disconnect the AC cord set completely. Open the battery compartment door and insert 4 pieces UM-2 "C" size batteries into the battery compartment with battery polarity as shown inside the battery compartment.

DIMMER (Control the brightness of the display)

1. Press and hold **FOLDER DN /DIM.** Button. The Display will show "H 1" (Default setting)
2. Press **FOLDER DN /DIM.** Button to select the desired display brightness. The brightness level: H1 > d6 > d5 > d4 > d3 > d2 > d1 > OFF
